

Do you struggle to produce your Annual FOIA Report?

Are you tired of using an inadequate tool that does not generate your report automatically?

Discover Your Trusted, Reliable FOIA Partner.

## FOIA Pro Security Statement

We take the security of your information very seriously.

Privasoft has designed FOIA Pro *Track and Report* with information security as a primary focus. With FOIA Pro you are not required to enter any item of information that will not be used in the production of your Annual Report, allowing you to avoid tracking personally identifiable information (PII). Since you will ultimately publish your Annual Report online, you may find that most if not all information involved is publicly releasable.

We understand that privacy and the confidentiality of your FOIA case data are extremely important. The application takes advantage of known, reliable security measures including encryption of user name and passwords.

By implementing these technological solutions we allow you to login securely and continue to exchange information with the application knowing that your information is protected by measures that stand up to the most stringent standards.

As an organization, we have been solving problems faced by FOIA teams around the world for nearly 20 years – helping departments and agencies to achieve FOIA goals, no matter how big or small.
